

SULTAN KHAN

SENIOR AI SOLUTIONS DEVELOPER

Lahore, Pakistan +92 323 8788300 sultan512@gmail.com linkedin.com/in/sultan-khan-278014121 github.com/sultan18kh

PROFILE

Senior AI Solutions Developer specializing in Flutter, Azure AI, and agentic AI systems. Five-time Microsoft certified, currently extending depth in Azure AI Foundry, Model Context Protocol (MCP) tooling, and Claude Code agent workflows. Production track record across BLE/IoT mobile (SOBRsure, \$10M seed), AI-powered enterprise SaaS, and healthcare-compliance automation. Active technical voice on LinkedIn covering agentic AI, MCP, Flutter, and Spec-Driven Development; open-source contributor.

EXPERIENCE

Senior AI Solutions Developer

AlphaBOLD

- Lead Flutter, Python, and Azure AI engineering across multiple enterprise products serving the Microsoft Dynamics CRM ecosystem.
- Built AI-powered resume parser using OpenAI APIs and AI score generator orchestrating Llama 3.2 and Claude AI models via LangChain for the BOLDHR platform.
- Engineered end-to-end NCCN healthcare-compliance automation covering PDF highlights and annotation extraction, LLM preprocessing with structured JSON output, deterministic rule-based comment lookup (replacing non-deterministic LLM generation across 30+ verbatim NCCN reference entries), metadata threading, and webhook-gated rule enforcement across a multi-PR feature stack with full regression sweep coverage.
- Delivered BLE-enabled IoT mobile platform with background location tracking, Android foreground services, iOS Live Activities, and BLoC/Cubit state management for the \$10M-seed-funded SOBRsure platform.
- Architected reusable Flutter mobile and web suite spanning CRM, rewards, build management, and HR — shared architecture: Azure OAuth, Microsoft Dynamics CRM embedded APIs, Hive offline persistence, Dio API caching, single-device session enforcement.
- Active technical voice on LinkedIn covering agentic AI, Claude Code workflows, MCP tooling, Flutter agent skills, and Spec-Driven Development; reaches engineering-leadership audience.

JUN 2021 — PRESENT

Senior Software Engineer

We > I (BridgeLinx)

- Mobile tech lead within the founding development team of three at BridgeLinx; the platform went on to raise a \$10M seed round.
- Built multiple Flutter applications (client, driver) with Mapbox navigation, Google Maps API, and Google Distance Matrix and Directions integration.
- Engineered Android foreground and background services for live location tracking, coordinate mapping, and persistence.
- Stack: Flutter, Android Studio, Google Cloud Services (Firebase Auth, Realtime DB, Firestore, Storage, Crashlytics, Remote Config), AWS.

JAN 2020 — JUN 2021

Software Engineer

Confiz Limited

- Microsoft Dynamics R&D team developing for D365FO and Dynamics AX R3 2012.
- Authored FBR Connect — C# .NET console integration with the FBR POS API, deployed live across major retail clients.
- Stack: D365FO, Dynamics AX R3 2012, .NET, SQL Server, Android Studio.

FEB 2019 — JAN 2020

Software Engineer

Finz Technologies

- Unity 3D developer specializing in 2.5D and 3D fighting games using the Universal Fighting Engine (UFE).
- Stack: Unity 3D, C#.

JUN 2018 — JAN 2019

Early career: Internships at Netsol Technologies (Android development, 2016) and Fauji Fertilizer Company (IT, 2017).

SELECTED PROJECTS

SOBRsure — SOBRsafe (US-based, \$10M seed-funded)

Flutter IoT mobile app for iOS and Android with advanced BLE connectivity, background location tracking via background isolates, Android foreground services, iOS Live Activities, BLoC/Cubit state management, and themed Google Maps integration.

Healthcare Compliance Automation — confidential client (NCCN guidelines)

End-to-end NCCN medical guideline automation. PDF highlights and annotation extraction feeding an LLM preprocessing pipeline (chunking, semantic segmentation, structured JSON output). Deterministic rule-based comment lookup (30+ verbatim entries, zero runtime LLM cost), metadata threading, and webhook-gated rule enforcement. Stack: Python, Azure Functions, Azure DevOps, OpenAI / Anthropic APIs.

AlphaBOLD CRM Suite — BOLDagimble, BOLDrewards, BOLDbuild

Flutter mobile applications for internal business operations across timesheet, rewards, and construction management. Shared architecture: Azure OAuth, Microsoft Dynamics CRM embedded APIs, BLoC/Cubit state management, Hive offline persistence, Dio API caching, single-device session enforcement, Syncfusion charts.

BOLDHR — *AlphaBOLD*

Flutter web application (Android in progress) with Node.js Express backend. AI-powered resume parser using OpenAI APIs; AI score generator orchestrating Llama 3.2 and Claude AI via LangChain. BLoC/Cubit state management, Beamer nested routing, responsive UI.

BridgeLinux — *We > I*

Member of the founding development team of three; served as mobile tech lead. The product went on to raise \$10M seed round. Built client and driver Flutter applications with Google Cloud Services, Mapbox navigation, Google Distance Matrix and Directions APIs, and Android foreground/background services for live location tracking.

Airlift PTS — *Pilot Training Application*

Native Android application built in Java with Firebase authentication and real-time database. Used Material Showcase View for onboarding, custom countdown timers, thread handling, and video playback with media controls.

 SKILLS

AI & Agentic Systems	Azure AI Foundry, Microsoft Copilot Studio, Model Context Protocol (MCP) servers and custom tools, Anthropic API, Claude Code, OpenAI API, Llama (open-weight models), LangChain, Retrieval-Augmented Generation (RAG), Prompt and Guardrail Design
Mobile & Cross-Platform	Flutter, Dart, BLE / IoT, Wearables, Android (Java / Kotlin), iOS
Cloud & Platforms	Microsoft Azure, Azure Functions, Azure CosmosDB, Azure AI Search, Azure OAuth, Google Cloud Platform, AWS, Firebase
Languages	Dart, Python, JavaScript, TypeScript, C#, SQL, PowerShell
Web & Backend	React.js, Node.js, Express, REST APIs
DevOps & Tooling	Azure DevOps, Git, GitHub, Docker, Claude Code (terminal), VS Code
Microsoft Ecosystem	Dynamics CRM, D365, D365FO, SQL Server, SSRS

 CERTIFICATIONS

APL-7008 Build Agents with Microsoft Copilot Studio (Applied Skills)	AI-901 Microsoft Azure AI Fundamentals (Refresh)	AI-900 Microsoft Azure AI Fundamentals
AZ-900 Microsoft Azure Fundamentals	DP-900 Microsoft Azure Data Fundamentals	AI-102 Azure AI Engineer Associate <i>In progress — before Jun 30, 2026</i>

 EDUCATION

Bachelor of Science in Computer Science <i>University of Management and Technology</i>	2014 — 2018 CGPA 3.25
A Levels (Sciences) <i>Garrison Academy for Cambridge Studies</i>	2012 — 2014 75.90%
O Levels (Computer Studies) <i>DHA Senior School for Boys</i>	2009 — 2012 82.55%
